Subject- Letter of recommendation - i-ጤና DIGITALMEDICINE

It is with great pleasure that I'm writing this letter of recommendation for **i-ጤና DIGITAL MEDICINE** on behalf of **The Ministry of Women, Children, and Youth** for the innovative strides the company is making in expanding primary health care to Ethiopians.

The Ministry of Women, Children, and Youth recognizes the company's efforts to expand the reach of health care to vulnerable demographic groups through the **Institutional Health care** and **Virtual Healthcare** projects. The ministry believes that i-ጤና and the projects it brings forth will result in a sustainable convenience to healthcare to the Ethiopian public in general and to women and children in particular.

The ministry will also like to acknowledge the immense job creation potential the company provides to health professionals at a time when unemployment levels are at an all-time high.

The ministry will work in close partnership with i-ጤና DIGITAL MEDICINE on all areas pertaining to providing healthcare to mutual focus areas which are women, children, and youth via the implementation of the above stated projects.

Sincerely

Kibebew Workneh Wasse

Subject: Letter of Recommendation- I-Tena Digital Medicine

I am writing this letter of recommendation on behalf of the FDRE Ministry of Innovation and Technology for I-tena Digital Medicine. The Ministry believes that I-Tena Digital Medicine is one of the strongest and thriving startup companies in the country with capacity transform itself into a position of pioneer in the sector.

The Ministry of Innovation and Technology is well aware of the instrumental role I-Tena Digital Medicine played to set up a call center that now connects medical doctors and anyone in our community seeking their health advice. This call center has become particularly useful during this time of a global pandemic where many people are afraid to go to health care facilities in fear of catching the Corona virus. We also believe the call center will remain critical in filling the health care seeking behavior gap that our health system suffers from; in the long run-contributing to the national vision of realizing a productive and healthy population.

Please feel free to contact me should you need more information on this from our end.

Sincerely,

Ahmedin Mohammed (PhD)

Subject- <u>Request letter for support</u>

The Ethiopian Job Creation Commission has been established by the Office of the Prime Minister under Article 32(13) of Proclamation No. 1097/2011. The commission targets by 2030, more than 20 million young people will have access to promising and secure employment opportunities, and that private investment and innovation will play a key role in the success of the program.

Accordingly**, i-Tena Digital Medicine's** 'Virtual Healthcare' and 'Institutional Healthcare' projects are believed to have the potential to create significant employment opportunities for health professionals. They are one of the 20 successful entrepreneurs in the 2013 Job Creation Commission's Bruh Innovative Business Idea Competition.

We are writing this letter of support because this creative idea can create jobs for many. Accordingly, the commission would like request you to provide them with any necessary supports and would like to thank you in advance for your cooperation.

Sincerely,
